

## Report on Visit to Blind School

Mundeshwari College for Teacher Education, organized an educational and community outreach visit to the “Rajkiye Netrheen Uchh Vidhyala” on 30/08/2025. The main purpose of the visit was to understand the teaching-learning process for visually impaired children and to develop sensitivity, empathy, and inclusive teaching skills among the future teachers. During the visit, the students interacted with the teachers and learners of the school and gained valuable insights into the methods of teaching through Braille, audio aids, and tactile learning materials. The students observed classroom activities and participated in interactive sessions, where the children enthusiastically showcased their talents in music, storytelling, and academic performance.

Our students also conducted fun learning activities and games to engage the children. They also distributed food packets and learning material to the children. This not only brought joy to the learners but also created an atmosphere of inclusivity and mutual respect. The faculty of the blind school appreciated the efforts of our college students for their involvement and encouragement. The visit proved to be a meaningful experience for the B.Ed. 2<sup>nd</sup> year trainees as it enriched their understanding of inclusive education and motivated them to adopt learner-friendly approaches in their future teaching careers. It was truly an inspiring and eye-opening experience for all.
