

REPORT

As part of the co-curricular activities conducted during my teaching practice at Bankipur kanya Madhya vidhyalay, a Diya Making Programme was organized on 11/11/2023 to celebrate the spirit of Diwali, one of India's most widely celebrated festivals. This programme aimed at engaging students creatively while also instilling cultural values and artistic skills.

Objective:

- Encourage creativity and innovation among students.
- Provide them with a hands-on activity that connects to their cultural heritage.
- Promote the importance of eco-friendly Diwali celebrations.
- Offer a platform for artistic expression and craftsmanship.

Students from various classes participated in the programme with great enthusiasm. The activity was planned in collaboration with school, where students were provided with clay diyas and art supplies such as paint, glitter, and beads to decorate their diyas. Teachers, trainees, guided the students through the process of diya decoration while explaining the significance of lighting diyas during Diwali. Through the activity, students developed fine motor skills and enhanced their artistic abilities by painting and decorating the diyas. Each student's diya was unique, showcasing their creative thinking and ability to experiment with different designs and patterns. The programme emphasized the importance of using eco-friendly materials and celebrating Diwali in a sustainable manner.

The Diya Making Programme was a resounding success, allowing students to connect with their cultural roots while engaging in a creative and enjoyable activity. It promoted values of eco-friendliness, collaboration, and artistic expression, making it a meaningful addition to the school's Diwali celebrations.
